

# Leather Cleaner

## Product Information

Pellé Automotive Leather Cleaner is specifically formulated to deep clean leather car upholstery – removing body oils, grease and dirt without damaging or denaturing the leather finish as household cleaners do.

The cleaning effectiveness and colour fastness has been proven using international standards - tested by New Zealand Leather & Shoe Research Association (LASRA) who operate under ISO 9002 & ISO/EMC 17025.

When used in conjunction with Pellé Automotive Conditioner Protector these products provide a comprehensive Leather Care system that has been shown to extend the wear life of upholstery leather up to five times compared to untreated leather (LASRA 2013)

This leather cleaner is easy to use, biodegradable and non-toxic. It also contains HealthGuard™ a full anti-bacterial, anti-fungal and anti-microbial agent which provides protection against mould and bacterial contamination.

## Feature Benefits

- Industry leading leather cleaner (tested and approved by LASRA)
- When used in conjunction with Pellé Automotive Leather Conditioner Protector, the Pellé Automotive Leather Care system has been proven to extend wear life of upholstery leather up to five times.
- Non Toxic and Biodegradable
