

Leather Revitaliser

Product Information

Pellé Leather Revitaliser is specifically formulated to nourish and restore waxed / oiled leather, countering the drying effects heat has on these types of leather.

Formulated using tanning agents that nourish the leather and restore the original oils which are removed through prolonged wear, contact with human skin and exposure to sunlight. Regular use helps restore and revive the colour, flex and original patina of the leather.

The effectiveness and colour fastness has been proven using international standards - tested by New Zealand Leather & Shoe Research Association (LASRA) who operate under ISO 9002 & ISO/EMC 17025.

It is important to first clean the item with Pellé Leather Cleaner removing surface dirt and body oils, as this allows the Pellé Leather Revitaliser to be absorbed into the leather.

This leather revitaliser is easy to use, biodegradable and non-toxic, meaning it is safe for use on family surfaces.

Feature Benefits

- Industry leading Leather Revitaliser (tested and approved by LASRA)
- When used in conjunction with Pellé Leather Cleaner, this Pellé Leather Care system has been proven to maintain the appearance and characteristics of waxed / oiled leather.
- Non Toxic and Biodegradable
- No Mess
- Recommended treatment every three months for domestic upholstery.
