

Leather Conditioner & Protector

Product Information

Pellé Automotive Leather Conditioner & Protector is a two in one product, specifically intended to nourish and care for leather automotive upholstery while also providing excellent protection against soiling and wear.

Formulated using tanning agents that nourish the leather and restore the original oils removed through prolonged wear, contact with human skin and exposure to sunlight.

The effectiveness and colour fastness have been proven using international standards - tested by New Zealand Leather & Shoe Research Association (LASRA) who operate under ISO 9002 & ISO/EMC 17025.

When used in conjunction with Pellé Automotive Leather Cleaner, these products provide a comprehensive Leather Care system that has been shown to extend the wear life of upholstery leather up to five times compared to untreated leather (LASRA 2013)

This conditioner & protector is easy to use, biodegradable and non-toxic. It also contains HealthGuard™ a full anti-bacterial, anti-fungal and anti-microbial agent which provides protection against mould and bacterial contamination.
